

LITTLEHAMPTON REGENERATION - SEAFRONT GREENS & PROMENADE

2. THE VISION & OVERARCHING PRINCIPLES

Keeping the Greens GREEN

35700m²

6300m²

Valuable flexible green space

Underutilised pockets of space

Planting lacks distinctiveness

35850m²

12000m²

Distinctive planting

Views out to sea from lawns

Planting to edges to provide structure

- Retain a similar amount of informal and flexible open green space as part of the greens defining character.
- Ensure large events such as the 'Screen on the Green' and 'The Littlehampton Bonfire Celebrations' are provided with the space they need to continue.
- Ensure that informal activity and passive recreation currently taking place is protected.
- Provide lawns that allow views into the greens but also lawn spaces that allow views out to sea.

- New planting supplies the structure and the setting of the place; planting will contain the greens and make the place feel more comfortable.
- Distinctive planting will be chosen to reinforce the coastal and maritime context, complementing the recently completed East Bank riverside walkway and the wider West Sussex coastline.
- Planting chosen to suit the local climate and the local context will ensure minimal maintenance and greatest success.
