In my view the proposed provisions to control music noise emanating from the site do not adequately prevent significant impact upon amenity of nearby residents.

The "scheme" will continue to rely heavily upon the applicants diligence in monitoring noise at the site boundary during amplified music events and controlling the noise at source in according to their Noise Management Plan. The Noise Management Plan has been agreed with the applicant as part the Premises Licence under the Licensing Act 2003 to assist in the "prevention of public nuisance", a lesser standard than prevention of significant impact upon amenity.

The document headed Sound Pollution Tests & Noise Limit Device, produced by Tri-Tech Electrical Limited, suggests that a noise limiting device placed in the marquee and set at 85dB will prevent music noise from exceeding 25dB at the nearest dwelling. I would suggest that a report from a suitably qualified Acoustic Consultant is obtained to verify the effectiveness of such a device. The report should include technical and operational details in respect of the noise limiting device, in particular how it is proposed to control bass frequencies (1/3 octave band between 40 and 160Hz). An assessment of the likely background noise level (L_{A90}) at the time the noise is likely to occur should also be included in the report.

The details of the Sound Reducing Inner Skin for the marquee are noted to provide substantial reduction in noise breakout levels at mid and high frequencies when compared to a standard unlined marquee, but little measurable improvement at low frequencies. Low frequency break out of noise from marquees can be greater than that from an equivalent sound source in the open due to reverberant noise build up within the marquee. It is also noted that that the reduction in noise break out was achieved under test conditions with the marquee opening flap closed with rope loop fastenings during measurements.

NOTIFICATION FROM ARUN DISTRICT COUNCIL

TOWN AND COUNTRY PLANNING ACT 1990

APPLICATION NO:	**PA/2/11/DOC**
Registered:	27-JAN-11
Site Address:	The Fox Inn Arundel Road Patching BN13 3UJ
Description of Works:	Application for the approval of details reserved by condition 2 relating to PA/10/08/ allowed on appeal

The Council have received the above application to discharge conditions. I shall be pleased to receive any observations you may wish to make in respect of those conditons relating to your field of expertise.
Click here to view the Discharge of Condition application

Click here to view conditions on original application - click on decision tab

Should you have any comments to make, these should be sent by replying to this email by 17th February 2011. You can also monitor the progress of this application through the Council web site:
www.arun.gov.uk/planning
Please be aware that any comments you may make will be available on our website.

In the absence of a reply within the period stated, I shall assume that you have no observations to make.

The officer dealing with this application is Mrs A Gardner who can be contacted on telephone number [redacted]

Thanking you in anticipation

Planning Case Officer
Arun District Council
