Oak tree @ Caiger's Cottage Westergate Street, Woodgate. PO20 3SQ

To whom it may concern,

We have worked in this area for approximately 8 years for various properties surrounding this property.
T3- Oak has been in decline for some time with us a company noticing the progressive deterioration of the crown, twigs dying back and now branches.
It has a very poor shape and form.
The tree now has a very notable cracking at of the bark at the base allowing entry of disease organisms and this is affecting the tree.
The owner of the tree has had numerous discussions regarding the tree with the property that the tree overhangs, the neighbouring property is worried regarding the tree and the dropping of branches
