Dear Sir/Madam,

I am writing to you to ask whether you would allow me to have two holly trees professionally removed from my back garden in Arundel the address being: 59 King Street,
Arundel,
West Sussex,
BN18 9BN

Although the trees do not have a preservation order on them they are in the conservation area.

The reason why I would like to have the two trees removed are mainly because they have become too large for the courtyard garden and are cutting out the sunlight. Over the past few years my neighbours have become very upset about them and have written to me threatening to take legal action. I can understand their reasons for this as their garden is very small and particularly narrow. After receiving a letter from them complaining about the height and thickness of the trees, which would have been about eighteen months ago now, I did get a professional company in to reduce the trees, but now they just seem to have grown out of proportion again. I am also concerned about the holly tree on the left as it is fairly

close to the back of the house, which I feel may eventually cause a problem to the foundations.

I would like to replace this tree with a much smaller tree possibly a fruit tree, but I would need to take advice on this, which would give somewhere for the birds and still allow sunshine into the gardens.

Any help you can give me regarding this situation would be greatly appreciated. I am writing you to request the property my contact [REDACTED]

Kind regards
[REDACTED]
