Marbank
CONSTRUCTION LIMITED

The following statement is written pursuant to the new proposed Retail Development at Shripney Road, Bognor Regis, to satisfy Planning Condition No. 10.

The site is currently hoarded on all boundaries with existing fencing which will remain in place throughout the construction period.

Marbank Construction Limited will install signage for the site to cover the following :

- Construction traffic arriving at the site.
- Pedestrians arriving at the site.
- Contract address and telephone numbers.
- Signage to meet Health & Safety requirements.

Construction Vehicle Cleaning :

Demolition and site clearance has already taken place and clean hardcore placed across the site. It is intended to work from this existing platform therefore avoiding any further reduced level excavation. This will also minimise any debris being deposited on the road.

Should any debris be deposited on the highway, this will be cleared by use of a road truck. If there is a risk of material being tracked off site, a jet washing facility will be provided at the site entrance, or at the location of the works in hand.

In addition to this, the mechanical road sweeper will also be employed where necessary.

This facility/arrangement will remain in place throughout the construction period.
