NOTE : This site may be within a designated area and is subject to possible RADON emissions through the sub strata - therefore the methods of any protection needed are:

1. To make application for a Radon Site Survey Report to the British Geological Survey at NRPB Chilton Didcot Oxfordshire OX11 ORQ (tel. Radon Hotline on 0800 614529) to obtain an application form the fee charge of which is £30.00 plus VAT

   or

2. To adopt a construction method of protection by use of a Radon Barrier (continuous layer - no joints) of 1200 gauge material under the oversite slab formation stepped up to meet the damp proof course to the inner skin of the wall and down the face of that wall and across the cavity and outer skin of the wall terminating at finished ground level (forming a cavity tray to the cavity wall construction all in accordance with each Local Authority's approval and any typical details or as otherwise shown on the application drawings

3. ONLY instigate an application for a Report if directed by the ADC Building Control as the area appears not to be affected
