

The Holm Oak - situated near bus stop on Felpham Road.

We have been granted permission twice to pollard this Oak, but we would prefer to take less drastic action and lift the crown above the level of the guttering.

The light levels in flats nearby are greatly affected by this evergreen - so much so that even in summer they have to have their lights on.

Planning application: Susanna Di Milo, Estate Manager, Gateway Lodge, Felpham Road, Felpham. West Sussex. PO22 7NS.

This Sycamore is situated between Gateway Lodge (Right) and 37 Felpham Road.

As you can see the main Trunk divides into to branches close to the ground level leaning towards each building to form a V shape.
The canopy is touching both roof gables and there is concern that one of the branches leaning towards 37 Felpham Road is diseased. (See picture 3) which has been taken from the first floor window down onto the trunk.
We are we are seeking a crown reduction of 25%.
