I am writing to object to planning notice
AB/115/14/OUT as the proposed houses will have
a detrimental adverse effect on my husband &
me. We live in the bungalow situated in the
corner between No 8-10 so the room does not get
much light. What little light we do get mainly
comes from area over the front gardens of 10-16
as my photos show. Allowing houses to be built
on the gardens of 12-14 will restrict this light
& further darken our house making us feel very
enclaved.

As we are almost house bound we spend
a lot of time in our front room so the
proposed will have a big impact on us. I don't
think the applicants have really considered the
effect this development will have on the neighboring
residents this will not enhance the houses & will
be detrimental to our health & wellbeing.

I am also concerned the development
will cause considerable disruption to us some who are elderly
like us need a clear & open access to our properties
via the path along the top. For disabled access at all
times & for deliveries & postmen & Ambulances if needed
to medical emergencies.
