Report on the trees down your east boundary

Dear Peter

Having visited site I can confirm that the trees (mainly yew trees) down the easy boundary have put on good growth since the last prune. I am happy to recommend that the trees can be cut back to the previous pruning points. This will involve the removal of approximately 1 meters lateral spread on the trees western spread. This will leave the crown spread on the trees western side at approximately 1 to 1.5 meters

To carry out the works recommended above, approval from Arun District Council will be required.

I hope you find the above helpful. Please don't hesitate to get in touch if you have any questions.
