TREE REPORT

RE: Oak TPOAB0103 38 Priory road.

The tree is a healthy specimen with thick new growth visible all over the canopy.

There is no sign of die back and the base is well rooted and solid.

The size of the tree is the problem. Situated very close to the properties surrounding and the shading in 4 Stewards rise is excessive. The risk for potential damage is very high as the canopy covers the garden and roof of 4 Stewards rise.

A reduction of 4 meters would provide the much needed light and breathing space for the neighbouring garden. And will reduce the amount of debris that showers the garden and house underneath.

Stripping the Ivy would also give the tree a less dominating feel and would allow light and wind to pass through the crown.

Nick Wilson
