

REASONS FOR PROPOSED TREE WORK

A1 row of self-sown Ash and Sycamore along the strip of ground south of the school:

- Fell approximately 35m of self-sown Ash and Sycamore
- Treat stumps with ecoplugs

The row of trees have now reached the fabric of the building and potentially could cause damage; they also block light to the adjacent classrooms during the summer months.

Their removal will abate the above nuisances and as such there is no scope to replant.
