

Heritage Statement 45&47 Tarrant Street Arundel BN18 9DJ

We would like to change the North facing front elevation from a yellow-cream colour to a blue-grey colour.

The colour will be quite similar to the houses on either side of us which are both grey.

We intend to use Farrow and Ball masonry paint which is recommended for Georgian exteriors.

I have attached the Farrow and Ball colour chart and have marked with a cross the Parma Grey which we want to use for the exterior walls and Railing which is for the doors. The properties on either side to us have used Railing for their doors and the lower part of the property which is below the ground level windows, street level. This will mean there is a continuation of the colour of the three properties.
