

Design and Access Statement 45&47 Tarrant Street Arundel

We wish to paint the front North elevation of our property which we think will look more appropriate and in keeping with the properties on either side of us which are painted grey.

The colour we have chosen is Parma Grey by Farrow and Ball, colour chart attached. This will just replace the areas that are now painted a yellow cream colour.

The windows which are now white will just be painted over with again a Farrow and Ball paint in 'All White' see colour chart. Which is the same colour as our neighbours on either side.

The doors will be painted Railing again by Farrow and Ball highlighted in the colour chart attached this is a dark grey replacing the colour black on 47 and white on 45. Our neighbours at 49 have the same colour door as we want to use – Railing.

We think painting the property will have a neutral impact on the local area and we have consulted with our neighbours and they are more than happy with our colour choice.
