

- **Birch** (T15) – dismantled and felled.
- **Birch** (T16) – dismantled and felled.
- **Ash** (T14) – dismantled and felled.

4.2 Details of the trees that I consider require further explanation or comment are noted below.

- **Monterey cypress** (T10) – needle loss and foliage browning noted within crown.
- **Box** (T12) – some dieback at branch tips.

4.3 There was no obvious decline in the condition of the remaining trees that represents a risk that requires remedial action at present.

5.0 CONCLUSIONS

5.1 Conclusions for the trees highlighted in the appraisal are detailed below.

- **Monterey cypress** (T10) & **Box** (T12) – needle loss, foliage browning and dieback may be weather related.

6.0 RECOMMENDATIONS

6.1 **Medium priority** – work to be completed in three months.

Tree No.	Species	Recommendations
T10	Monterey cypress	Re-inspect in three months.
T12	Box	Re-inspect in three months.

6.2 A full re-inspection of the trees should be undertaken in **April 2020** or sooner if obvious changes in the trees' condition are noted, i.e. storm damage following extremes of weather.
