Savolit Plus Wood Wool Building Boards 15mm 2400x600mm

To Order Call Us On

Savolit Plus is the result of continuous research and the desire to provide the best environmentally friendly products and solutions. Savolit Plus wood wool boards are genuine natural panels and consist of long, strong wood fibres which are mineralised and bonded into panels. The raw timber originates from sustainably managed forests and is PEFC labelled. From production, installation, lifespan and decomposition (recycling) Savolit Plus panels do not pose a risk to the environment. Savolit Plus wood wool boards are 100% recyclable.

Savolit Plus Boards Applications

- Savolit Plus Boards ideal for external cladding of timber frame walls
- Internal lining of timber frame walls
- Base Board for plastered ceilings and walls
- Internal partition walls
- Carrier board for render

Savolit Plus Composition

Savolit Plus wood wool boards consist of long strong wood fibres, stabilised by chemical impregnation and bound by cement-binding agent into a compact coherent structure. The mineralisation process strongly increases the fire resistance of wood wool. The composition and performance of the boards make them ideal for many different applications in building constructions. As a result of Plus panels composition, tests have shown that they are unaffected by moisture and frost. Produced in accordance to standard EN 13168 and are CE marked. Savolit Plus timber comes from forests certified PEFC that are sustainably managed.

Ecological and Health Aspects

- Many sustainable benefits
- Boards are made of natural materials
- No waste disposal problem
- Ideal for buildings comfortable for people sensitive to allergies
- Recommended for healthy living environments
- No harmful gases or vapours given off
- No toxic fumes if burned
- Diffusion permeable
- Hygroscopic – levels out humidity level changes
- Naturally resistant to fungus and insects

Technical Advantages

- Unaffected by humidity and frost
- Durable
- Non flammable and self extinguishing
- Thermally insulating
- Compatible with all normal construction materials
- High compression resistance and flexural strength
- Stable
- Surface offers good mechanical key for renders and plasters

- Sound absorbing and noise insulating
- Vapour permeable
- Easy and safe to handle, cut and work
- Proven performance in over 80 years in all climates
- Available in wide range of board sizes
- Low environmental impact
- PEFC certified
