Good Evening.

Reference the above planning application. Whilst I appreciate I have missed the comment deadline I strongly object to the application. Unfortunately due to both of my children and my husband being extremely unwell it was not possible for me to comment in time.
The loss of this car park will have a devastating impact on Canada Road and Ellis Close. As it currently stands there is insufficient parking in the area. Resulting in residents having to park in precarious postions. The Ellis Close car park provides an over flow which massively alleviates this issue. Being a shift worker I feel this more acutely than most as when returning from a late shift I often have to park in the Ellis Close car park and walk to my home address in Canada Road. Should I no longer have this option I will have to park a considerable distance from my home and walk back at times in the early hours of the morning. Canada Road is used as a rat run from the main A27 which makes this an even more pressing issue. As the disruption any building works would cause is likely to make this an even more concerning and dangerous issue.

The space specified is utilised by the local community yet we are being asked to sacrifice this to essentially squeeze in a few houses. There are far more suitable sites locally to support the need for affordable housing. Sites that will result in larger developments which will benefit far more families.

Kind Regards Della Squires
