13th January 2015

Dear Sir/Madam,

Ref: 23 King Street, Arundel, BN18 9BJ: Planning Application Nos AB/166/14/HH and AB/162/14/L

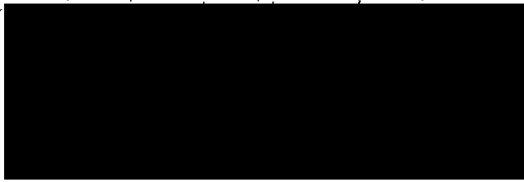

I write this letter to express my support for the planning applications for 23 King Street, Arundel as referenced above. I think that these planning proposals are quite minimal in their impact both on the locality and the property itself, compared with numerous developments in King Street which have taken place over the past years and in some cases recent months. I note that all "original materials" have now been stripped out to take the dwelling back to square one, very necessary as nearly all of it was of Formica and Soft Board finishes from the 1950's and 1960's eras and very unsuitable for both purpose and appearance.

On a personal note it is good to see the house go from the long standing residency of local people to the new owners Mr and Mrs Clifton who have also lived and worked locally in the diocese for many years.

I hope that this letter is of help to both you and your team during your review of the planning applications.

Yours Sincerely,

Terry Dove
