

3 Penfolds Pl, Arundel BN18 9SA

The tree in question is a mature English Oak, in recent years we have become increasingly concerned about the mature limb overhanging to the east and the amount of deadwood the tree continues to produce. This summer we noticed that the limbs leaves were very discoloured and all the leaves had dropped off by August.

I believe this limb now poses a potential threat and needs to be removed 1 metre out from the union! I would also like to apply for the remaining canopy to be crown reduced by 1 metre to the previously pruning points.

In my experience I can see this Oak coming to the end of its life over the next 10 years the increasingly sparse canopy and constant dead wood.
