Subject: Planning condition 5 discharge AB/3/09/

Good morning Anita,

I have just come out of Arun council offices where I have paid the cheque for application to discharge planning conditions 5,6 and 9 for Arundel Heritage centre along with the application for discharge form. Please find below our request to seek permission to use piled foundations at this project.

Condition 5 is the requirement to seek express written permission for the use of pile foundation on the project. I have attached the method statement from our piling contractor 'Colet Piling' confirming that we are proposing to use continuous flight augur piles. I understand that this method is generally accepted as suitable for preventing soils from upper strata's potentially contaminating lower levels. We have also had a WAC test carried out for the soil on site, which has found no significant levels of contamination. The principal reasons for requesting the use of continuous flight piled foundations is the need to find a satisfactory bearing level for the foundation loads and to minimize the risk of vibration that could cause damage to the listed remains of the Friary if driven piles were used. Please let us know if we can provide any further information to assist with this request for permission.

Can you confirm that you still have my initial emailed method statements for the application of discharge of conditions 6 and 9 or if you require me to re send these.

Regards

Ben Garner ic108
