Dear Sirs

**Objection to Proposed development at Greenhurst and Blastreat,
Fitzalan Road, Arundel – AB/36/18/PL**

I am aware that others will have highlighted many issues over this proposed development, including the inadequate Victorian sewage pipe that runs along Fitzalan Road, but I'd like to stress that should this development progress then ADC should take the opportunity of sorting out the dangerous footpath at the northern end of the road.

A footpath all the way around the site and a pedestrian/zebra crossing is essential. It needs to be continued from the existing path opposite this house (6 Fitzalan Road) – across the driveway used to access Openreach (BT) which means the removal of some brickwork- and it should be of a proper width, unlike the existing path on the west side, opposite the proposed development, which is narrow, not more than 3' by the lamp-post, and is dangerous as overhanging foliage in the summer over forces pedestrians into the road.

Finally I would like to stress that I am not opposed to a housing scheme at Greenhurst and Blastreat, I would just like the above to be given serious consideration when decisions about the application are being made.

Mrs A Standring

6 Fitzalan Road
