7. Identification Of Tree(s) And Description Of Works

Please identify the tree(s) and provide a full and clear specification of the works you want to carry out. Continue on a separate sheet if necessary. You might find it useful to contact an arborist (tree surgeon) for help with defining appropriate work. Where trees are protected by a TPO, please number them as shown in the First Schedule to the TPO where this is available. Use the same numbers on your sketch plan (see guidance notes).

Please provide the following information below : tree species (and the number used on the sketch plan) and description of works. Where trees are protected by a TPO you must also provide reasons for the work and, where trees are being felled, please give your proposals for planting replacement trees (including quantity, species, position and size) or reasons for not wanting to replant.

E.g. Oak (T3) - fell because of excessive shading and low amenity value. Replant with 1 standard ash in the same place.

I have had T&P Tree Surgeons outline what needs pruning now.

- (1) The first is the tall Scots Pine in the corner at the back of the property, which has a distinctive fork in it, and a 18/20 ft leader to the Right. That needs cutting off to the fork. The weaker stem to the left, which needs 2/3 cutting off, and the remaining 1/3 will revive as the new leader.
- (2) The next is the Bay tree between the Scots Pine and the Eucalyptus, which should ideally cut down to Hedge Height, and if that isn't possible 8ft, which like the Scotch Pine, hasn't been touched for some years, if ever by professionals.
- (3) The Eucalyptus has already grown back so much since the last time it was pruned. I would like to pollard the tree as has been done previously, which my experts tell me is possible, and tidy off all the recent growth smooth again, meaning we have a completely fresh start again.

8. Trees - Additional Information

For all trees

A sketch plan clearly showing the position of trees listed in Question 7 must be provided when applying for works to trees covered by a TPO. A sketch plan is also advised when notifying the LPA of works to trees in a conservation area (see guidance notes). It would also be helpful if you provided details of any advice given on site by an LPA officer.

Please indicate whether the reasons for carrying out the proposed works include any of the following. If so, your application must be accompanied by the necessary evidence to support your proposals. (See guidance notes for further details)
