

Application ref AB/4/25/HH

### Biodiversity Enhanced Statement

This is to support the above application on how the application seeks to protect and improve the existing on site natural environment.

The proposed building is on the original concrete patio area and therefore is not taking any 'green space'. However, in preparation of the extension extensive planting has already taken place further along the garden and we plan to plant new shrubs and bushes to the left side boundary on completion of the build. These are all species of plants that will aid the natural habitat and encourage wildlife.
