If you know which TPO protects the tree(s) enter its title or number below

7. Identification Of Tree(s) And Description Of Works

Please identify the tree(s) and provide a full and clear specification of the works you want to carry out. Continue on a separate sheet if necessary. You might find it useful to contact an arborist (tree surgeon) for help with defining appropriate work. Where trees are protected by a TPO, please number them as shown in the First Schedule to the TPO where this is available. Use the same numbers on your sketch plan (see guidance notes).
Please provide the following information below : tree species (and the number used on the sketch plan) and description of works. Where trees are protected by a TPO you must also provide reasons for the work and, where trees are being felled, please give your proposals for planting replacement trees (including quantity, species, position and size) or reasons for not wanting to replant.
Eg. Oak (T3) - fell because of excessive shading and low amenity value. Replant with 1 standard ash in the same place.

REASONS FOR PROPOSED TREE WORK

T1 Cherry Plum along rear fence line:

o Shorten apical and lateral growth by a maximum of 1m

• Current height 7m

• Finished height 6m

• Average crown spread 3m

• Average reduced crown spread 2m

o Crown thin by 15% leaving a maximum wound of 25mm diameter

The tree is beginning to get big for its location with branches extending over a number of properties; the tree work specification is intended to retain the tree whilst reducing its overall crown size and density

8. Trees- Additional Information

For all trees

A sketch plan clearly showing the position of trees listed in Question 7 must be provided when applying for works to trees covered by a TPO. A sketch plan is also advised when notifying the LPA of works to trees in a conservation area (see guidance notes). It would also be helpful if you provided details of any advice given on site by an LPA officer.
