AB/61/18

The proposal is for replacement windows to the side of the building. The existing windows are constructed from inappropriate materials, and are visible to the public highway.

The revised details, which have recently been provided, ensure that all of the proposed windows are multi-paned. Such an approach is supported as the proposed windows now bear some resemblance to those that were previously removed. As a consequence, the application can now be supported.

Details such as colour are provided as part of the application, and do not need to be conditioned.
