Ref: 92826/TN01

Dear Kate,

We have reviewed the drawings listed in Appendix A. These show a revised layout from that assessed in our report 92826/PNA1 Rev 01, dated 3rd December 2024.

The building has been moved approximately 2.8m rearwards from the front of the plot. There are other detail changes to the façade, including a small reduction in the area of the windows to the workshop. In neither case will the design change result in any appreciable change to the noise predictions set out in the report, and both cases that change will be positive, i.e. sound levels at the nearest neighbouring property will be slightly lower than predicted in our report.

We therefore consider that the results of our assessments set out in the report are unchanged by the new building layout.

Please contact us if you have any questions.

Yours sincerely,

Nigel Chandler
