

19 King Street, Arundel - Joinery Details

Roof

An Exitex roofing system with thermally efficient glass such as Planitherm 4S or equivalent is to be directly fixed on to rafters. Please see detail and picture below for examples of the fixings of the glass and capping to be used.

Please see drawing number 13519/103 for 1:20 detail of how new roof and glazing system adjoins the neighboring property.

Windows

The window in the West end shower room is to be the single glazed timber casement currently in the Dining Room. (See Pic. Below)

The direct glazed windows above the doors in the Kitchen are to use 12mm Krypton filled double glazed units so as to minimise thickness whilst maximising thermal efficiency. Please see detail on drawing number 13519/105.

Doors

The double doors to the Kitchen are to be casements with 12mm Krypton filled double glazed units with mullions to match the doors on the first floor to the New Bathroom. Please see picture below and details on drawing number 13519/105.
