AB/81/18/DOC

I note that the application relates to the provision of a new gate to the rear of the property in a former opening. The application included a picture of the proposed style of the gate, which it is assumed was used to determine it.

I note that the current application includes a description of how the gate will look. The concept of a solid gate is supported, however no picture has been provided as to its exact appearance. Further, it is not clear what the handle will look like, or what the exact colour will be (is it dark blue?) such information will be needed, even if it is in the form of a photograph with relevant information?
