

The Shed I wish to install is a shed by Malvern. I want to have a safe and cosy setting for the children in my care to feel like home but keeping with the charm and atmosphere feel of Arundel gardens. All the materials used on and in the shed are neutral and keeping with the natural environment as well as blending in with the garden.

The garden can not been seen from any other resident apart from either side and not by the road due to being on the hill. There is also no actual access from the garden but there is still access through the house.
