Dear Mr Sullivan,

Re: Arundel Museum and land to the rear of the Norfolk Centre, Mill Road, Arundel

Further to our recent exchange of emails, I now enclose, on behalf of Arundel Museum Society, a planning application and three copies. A cheque for the fee of £195 is also enclosed.

This letter (and the photographs already submitted) should be read in conjunction with the application.

This application is for a change of cabin/container to one of a smaller size. Consent for the larger one was granted under number AB/118/14/PL.

The cabin/container, for which consent has been granted as above, was moved from its former position in the overflow car park in Mill Road on 22 January 2013. We had already arranged for the parking bays to be suspended to enable the move to take place. The flat bed lorry that removed it was prevented from turning into Mill Lane (and thence to the land behind the Norfolk Centre) only because of the scaffolding that had been erected outside Sims Williams in Mill Lane.

This meant that, having removed the larger cabin/container from its former site, there was now nowhere to place it. Norfolk Estates kindly came to our aid at very short notice, but that meant removing from Norfolk Estates land the smaller cabin/container – the subject of this application – and placing that somewhere else, pending us

making this application and receiving consent. Because of its substantially smaller size, the flat bed lorry was able to negotiate the scaffolding.

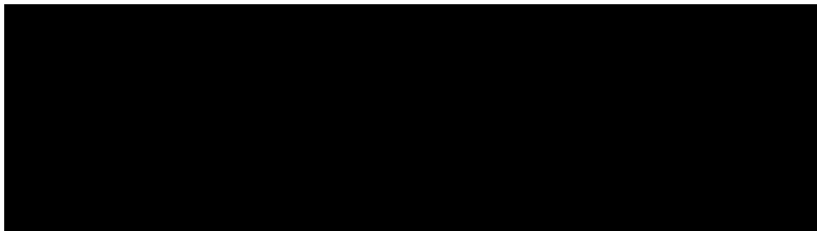

The cabin/container will be used for the restoration of artefacts which, when restored, will be displayed in the museum in Mill Road.

The applicant accepts that, if consent is granted, it will, if required, be subject to the same conditions attaching to AB/118/14/PL, viz:-

1. It will subsist only for a period of three years from the date of consent and
2. The end elevation facing the High Street will be clad in timber to match the Norfolk Centre.

I thank you for your help to date look forward to hearing from you.

Yours sincerely,

Christopher Boyce
