Dear Karen

Thank you for getting me over to take a look at the three trees in question, behind the bungalows at Fitzalan Rd, Arundel

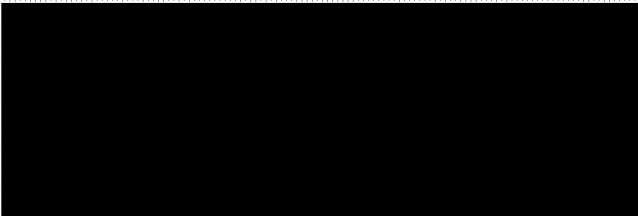

### **I report on the following Three Trees -T1, T2 and T3**

T1 Dead Mature Weeping Willow to the rear of No 40 Fitzalan rd. This tree is completely dead and needs removing before it collapses, due to fungal decay.

T2 Mature Weeping Willow to the rear of no 32 Fitzalan Rd. The tree is in good health. One of its lower limbs which grows out over property 32 has a large cavity in it. This is an easterly limb. I recommend the limb is lightly pruned by tipping it back by approximately 2.5 meters.

T3 Mature Weeping willow to the rear of property no. 28, Fitzalan rd. This tree is in average to poor condition and supports some large dead limbs. I recommend the Major dead wood is removed and the remaining growth out over the property (easterly spreading limbs), tipped back by approximately 2 meters.

I hope the above helps you move forward in dealing with these issues on this site. Please don't hesitate to get in touch if you have any questions.

John Bentley ND Arb
