Subject: Re: Request for further information AB/98/20/T

Dear Neil

With ref to Application AB/98/20/T , I can confirm that the lower easterly spread on T2 will be approximately 3 Meters in length once the pruning works on the limb with the cavity has been completed. Pruning cuts will be no more than 150mm in diameter.

The final measurement of the easterly spread on T3 after pruning will be approximately 3.5 Meters (final pruning cuts being no more than 150mm in diameter)

With reference to the application where I have clicked on there being alleged damage, this was a mistake. There is no alleged damage. The reason for the works is solely for safety reasons.

I hope the above helps with getting the points you picked up on sorted.

Kind regards

John
