Planning Resources,

I am interested in this planning application since it is linked to other applications which concern me. (Land West of Fontwell Avenue - Susan Smith - Westfield House, Fontwell Avenue.)

I first reported this unauthorised construction in May 2018. I was assured that retrospective planning permission would be sought. This application is still on the web site ten months later. It is still 'live' and nothing has progressed. I have made my objection and will soon make another, if it remains at it is. There is clearly no incentive for the applicant to make this application properly, so it should be refused and the applicant made to remove it. When are you going to do your job properly? There are complications with the ownership of this site and you have been informed about this already, so you cannot claim that a mistake has been made. What are you waiting for?

Susan Smith.
