

Andrew & Kuniko Juniper
Long Barn, Norton Lane, Norton PO18 3NH

17th Sept 2018

To whom it may concern

Having recently moved into this new residence we are keen to try to minimise our carbon footprint. As there is no mains gas in Norton the building is reliant on electric heating and so the installation of a PV array would greatly help to reduce the amount of carbon we use to heat the property and the water.

The rear (south facing) roof of middle barn in the garden where the PV are proposed to be sited is not visible from the road.

We feel that this is a good opportunity to contribute to the UK's renewable energy without compromising the beauty of the Norton Conservation area.
