Land East of Orchard Gardens - Objection

FAO Claire Potts

On Friday 27th I came home from work to discover that most of the trees and the vegetation had been cut down in the fields to the rear of Woodgate Park, in doing these works they have managed to destroy the fences to the rear of my own property and the neighbouring 3 properties, It seems that the applicant and their agents have no consideration for not only the wildlife but for the residents also. We were lead to believe that no other works would be carried out until and if planning was approved.
