PLAN-025202
Date
22/11/2018

Dear Sirs,

Proposal: Single storey and two storey extensions, creation of additional habitable roofspace, and alterations including external rendering and cladding
Site: Little Glebe, Little Heath Road, Fontwell, Arundel, BN18 0SR.
AL/111/18/HH

Thank you for your letter of 18/10/2018.

The applicant is advised to consult the Environment Agency directly regarding the use of a sewerage treatment plant which disposes of effluent to sub-soil irrigation. The owner of the premises will need to maintain the works to ensure its long-term effectiveness.

Our initial investigations indicate that there are no public surface water sewers in the area to serve this development. Alternative means of draining surface water from this development are required.

Due to changes in legislation that came in to force on 1st October 2011 regarding the future ownership of sewers, it is possible that a sewer now deemed to be public could be crossing the above property. Therefore, should any sewer be found during construction works, an investigation of the sewer will be required to ascertain its condition, the number of properties served, and potential means of access before any further works commence on site.

The applicant is advised to discuss the matter further with Southern Water, Sparrowgrove House, Sparrowgrove, Otterbourne, Hampshire SO21 2SW ([REDACTED]) or www.southernwater.co.uk.

Due to surface water inundation issues in the Lidsey Catchment “The applicant is advised to adopt, where appropriate, the measures in the table “Practical measures to reduce the potential impacts of development”.

Developer should look to protect the public sewerage system from inundation and infiltration, which contribute to flooding in unfavourable conditions.

Yours sincerely,

Luis Silva
