Absurd. How are these companies even allowed to submit a planning application? It seems apparent to me that any new development in this area will put the entire district under water. This development is ill thought out and with no consideration for the existing community, just like every other new development that's shot up in the last two years. Please, whoever reads this, have some compassion for our natural world. This land is a biodiversity corridor which is crucial for migrating birds and other organisms. How is it right that we get to jeopardise these ecosystems? My family and I have spent much time observing this area. As much as we need dwellings for whoever can afford these overpriced monstrosities, the community and wildlife need it to stay as it is. This land has already had planning refused due to poor drainage. Nothing has changed since then. The recent weather has highlighted the importance to keep these areas free of non-porous, unadulterated grass, trees and soil to allow the rainwater to soak away. Please, consider the existing homeowners and road users. We don't need this. Keep our current homes free of flooding and keep the habitats natural and alive.

Your views as made above will be considered before the application is determined.
