Dear Andy

Thank you for your email. I concur with it's content entirely.

As you say there is no plan for any infrastructure, the government seems to hope that it will miraculously appear. There are moneys given by the developers but they are shared out between parish, district and county councils with of course the government also taken a share, this means that no single organisation gets enough to provide any of the needed infrastructure. Indeed most of it seems to go now on repairing the damage caused and filling the gaps caused by government cuts.

We must all stand up against this and I believe that together we can stop the madness.

Yours

Paul Ayling

Hi, having read a recent planning notice and I wish to raise some concerns regarding the proposed planning as detailed above.

There has in our local area been significant developments in recent months and I have concerns with regard a number of items;

- a significant increased volume of vehicle access as most homes will probably have two maybe three cars and this leading onto the A29 on an already congested highway will massively accentuate current congestion.

- The area has recently felt like an island with frequent closures on the A29 to Shripney, the A29 at Fontwell, the Barnham Road being shut for some weeks and also the Nyton Road due to flooding and an already inadequate infrastructure .

- Sewage and flooding has been prevalent in recent weeks / months and I would want to understand how this would be mitigated with the increased volume of the new homes proposed as I fail to currently see what increased structures have been put in place to mitigate the current flooding issues for existing residents.

- what plans are there to improve availability of school places to increase capacity ? NHS dental services and swifter access to GP appointments.

- access to open spaces, green and natural environment are vital to improve our physical and mental health .

Thank you,

Andy Reeves
