Dear Anneka

Thank you for your email. I completely agree with your every word.

The reason these developments get through is because of the government imposed housing supply figures. We must fight for a change of policy or change of government. In the meantime I believe we must organise protests to raise public awareness or nothing will happen before it is too late.

Thanks again

Paul Ayling

CAUTION: This email originated from outside of the organisation. You should take extra care when clicking links or opening attachments - if you are unsure the content is safe contact the IT Helpdesk before clicking or opening.

I am emailing to object to planning application AL/11/24/OUT for 400 homes to be built in Westergate West Sussex.

I live right next to where the houses are to be built and I often walk through the fields and see a variety of birds , lizards and other wildlife. Building on this land will harm all of the wildlife here . Also a chalk stream runs through and there aren't many of these now.

We already have more flooding from recent new housing being built and the roads can not cope with any more. Southern water recently advised against more homes under a recent planning application W1/23/111/PL as they responded that the local catchment is being overburdened during periods of rainfall. The local road network does not have the capacity to handle periods of rainfall for example shripney road, nyton road and barnham road and now fontwell road.

There is already limited availability for the local gp surgery. I've had experience of not being able To see my dr for nearly 2 months and many errors as I have been told that they are over Capicity of more than 1000 patients, people's health is very important.

We've already had our quota of new housing I feel in Westergate , a small village that shouldn't be turned into another town!

Please take all of this into consideration

Anneka freeman
