Dear Simon

Please find attached the scanned Statutory Declaration of Mr Darren Searle and supporting documents. From your email below of 16th January 2017 it is already common ground between us that the application structure is a building that is now immune from planning control and is lawful development. The Stat Dec therefore specifically addresses the issue of the residential use of that building. From the attached evidence it is manifestly clear that the application should be approved and the Certificate as applied for issued.

Many thanks

Angus
