

Application No: AL/129/21/OUT

I agree with the conclusions of the desk based assessment study with regard to the archaeological potential of this site, the likely impact of development on anything of interest that it might contain and the proposed procedure to mitigate this. I also agree that the latter, which should comprise an evaluation by trial trenching followed by appropriate measures to preserve the significance of any important remains thus identified, would be best secured via the imposition of a suitable version of standard archaeology condition ARC1 as follows:

No development shall take place until the applicant has secured the implementation of a programme of archaeological work in accordance with a written scheme of investigation which has been submitted by the applicant and approved by the Planning Authority.
