Hi Simon,

Thanks for your time on the phone regarding the below. Further to my explanation on how the groups (essentially Cypress hedgerows) are presented on the TPP please also see attached a corrected AIA and TPP to incorporate G68 and thanks for bringing this to my attention.

Kind regards,

Nigel Jarvis | MRTPI | Director

Hi Nigel,

I'm just putting together our appropriate assessment under the Conservation of Habitats and Species Regulations 2017 (as amended) due to the site being within the 12km zone of the Singleton & Cocking Tunnels SAC.

It's proving difficult to quantify the amount of tree loss in this assessment using the info in the Arboricultural Assessment & Method Statement and Tree Protection Plan. The latter is unclear as to which trees are being removed. Is there a tree survey/constraints plan to go with the assessment? Also in the Tree Protection Plan G68 is indicated in red which I think means removal but there is no note in the legend for G68 to say whether parts of this are being felled.

Can you speak to your tree consultant and get some additional info to me next week as I need to get this assessment finished and off to Natural England.

Simon
