Thank you for your internet representation made on 10th August 2022 which has been recorded as an objection with the comments as follows:

OWPC49782

So despite the site being closer to the landfill site than the developers said you propose to still allow this development to proceed. We now have people on site digging more holes to check the ground water level for contamination in case you hadn't noticed we are currently in a drought there are photographs available for many years showing the site under water also stockholm nursery which has boundaries next to the development were refused to use a bore hole to water there salad crops as the water was contaminated from the landfill how much more evidence do you need to realize that these developers need to find somewhere else more suitable like a brown field site

Your views as made above will be considered before the application is determined.
