Subject: RE: Planning Consultation on: AL/20/18/OUT

App No: AL/20/18/OUT

Address: Land at Bridge Cottage & The Old Cottage Lidsey Road Lidsey PO22 9PH

Proposal: Outline application with all matters reserved for the demolition of 2 No. dwellings & associated outbuildings & the erection of up to 27 No. dwellings, of which 30% will be affordable, with associated open space & access. This application is a Departure from the Development Plan.

Bats

As detailed within the Preliminary Ecological Appraisal (Jan 2018) there is potential for bats to be roosting within the property on site. Due to this and as recommend within the survey further bat emergence surveys are required to determine if bats are roosting onsite prior to determination. This survey needs to be undertaken by a suitably qualified ecologist during the active breeding period (May – September) and submitted for our approval with the planning application. If bats are found to be roosting within the building mitigation will be required and a mitigation strategy should be produced and also submitted with the planning application prior to determination.

Trees T01 and T02 will need to be retained due to the bat roosting potential they hold. Please can we have confirmation that these trees are remaining onsite. If they do need to be removed further bat surveys will be required on them.

The lighting scheme for the site will need to take into consideration the presence of bats in the local area and the scheme should minimise potential impacts to any bats using the trees, hedgerows and buildings by avoiding unnecessary artificial light spill through the use of directional light sources and shielding.

Reptiles

Due to the current condition of the site and the information provided with the Ecological Appraisal there is potential for reptiles to be onsite. Due to the protection reptiles hold the applicant will need to have reptile activity surveys undertaken by a suitably qualified and submitted with the planning application prior to determination. If reptiles are found to be present onsite then a mitigation strategy will also need to be written and will need to include details of reptile fencing, translocation methods, the translocation site / enhancements and the timings of the works.

Nesting Birds

Any works to the trees or vegetation clearance on the site should only be undertaken outside of the bird breeding season which takes place between 1st March – 1st October. If works are required within this time an ecologist will need to check the site before any works take place (with 24 hours of any work).

Kind Regards

Liz
