

Please substitute the attached Drainage Statement (0001 P01) for the existing one on the website (“Drainage strategy 0001 P04” in Statements dated 04/03). Note although the new Revision number is not greater than the existing, the substitute report is a newer version so please just roll with it.

Sarah – they have asked that I reconsult you. I know you don’t need any more work so don’t make it a priority case.

Kind Regards

Dear Simon,

Please find attached an up-to-date Flood Risk Assessment and Surface Water Drainage Strategy, which should supersede the report of the same name which was originally submitted with the application.

Please may the Council’s drainage officer be re-consulted so that they can provide new comments based on this updated report.

Kind regards
