2 Site Address

Land North of Lee's Yard
Lidsey Road
Woodgate
PO20 3SU

3 Description of Development

Outline application with some matters reserved for the erection of 38 No. dwellings consisting of 5 No. 4-bed house, 14 No. 3-bed houses & 19 No. 2-bed houses, with communal work hub & associated car parking & landscaping (resubmission following AL/57/18/OUT). This application is a Departure from the Development Plan.

4 In pursuance of their powers under this Act and related Orders and Regulations the Council **PERMIT** this development to be carried out in accordance with the application and plans and subject to compliance with the following conditions and Section 106 Agreement.

1 The permission hereby granted is an outline permission under s92 of the Town and Country Planning Act 1990 (as amended) and an application for the approval of the Local Planning Authority to the following matters must be made not later than the expiration of 3 years beginning with the date of this permission:-

- (a) Layout;
- (b) Scale;
- (c) Appearance;
- (e) Landscaping.

Reason: To enable the Local Planning Authority to control the development in detail and to comply with Section 92 of the Town and Country Planning Act 1990 (as amended).

2 The development hereby permitted shall be begun either before the expiration of 5 years from the

date of this permission, or before expiration of 2 years from the date of approval of the last of the reserved matters to be approved, whichever is the later.

Reason: To enable the Local Planning Authority to control the development in detail and to comply with Section 92 of the Town and Country Planning Act 1990 (as amended).

- 3 The development hereby approved shall be carried out in accordance with the following approved plans:

Location Plan Dwg 001 Rev A;
Block Plan Dwg 002; and
Access Plan Dwg 6530A/102 Rev B.

Reason: For the avoidance of doubt and in the interests of amenity, road safety and the environment in accordance with policies QE SP1, D DM1, T SP1, T DM1 and C SP1 of the Arun Local Plan.

- 4 The development must be carried out in accordance with the mitigation measures and enhancements specified within the Ecological Impact Assessment (Rev 01, 06/03/20). The enhancements and mitigation measures shall be implemented in full and permanently retained and thereafter maintained as fit for purpose.

Reason: In accordance with Arun Local Plan policy ENV DM5 and the National Planning Policy Framework.

- 5 The details submitted pursuant to Condition 1 shall include acoustic fencing in accordance with sections 9.3 & 9.4 of the noise report by Acoustic Associates Sussex Ltd dated 02/04/2020 (project ref: J2489)

Reason: To protect the amenities of new residents from noise associated with the industrial site to the south and the main road to the west in accordance with Policy QE DM1 of the Arun Local Plan.

- 6 The details submitted pursuant to Condition 1 shall include measures to ensure that the risk from flooding to the proposals is reduced. This could include having the finished floor levels of the affected properties set above flood levels.

Reason; To protect the residents from the affects of flooding and noting that a small area of the eastern part of the site is affected by surface water flooding therefore in accordance with policies W DM2 and W DM3 of the Arun Local Plan.

- 7 No construction activities shall take place, other than between 08:00 to 18:00 hours (Monday to Friday) and 08:00 to 13:00 hours (Saturday) with no works on Sunday or Bank Holidays.

Reason: To protect the amenity of local residents in accordance with policies QE SP1 and QE DM1 of the Arun Local Plan.

- 8 No development shall take place, including any works of demolition, until a Construction & Environmental Management Plan has been submitted to and approved in writing by the Local Planning Authority (who shall consult with West Sussex County Council and the Councils Environmental Health Officers). Thereafter the approved Plan shall be implemented and adhered to throughout the entire construction period. The Plan shall provide details as appropriate but not necessarily be restricted to the following matters:

- An indicative programme for carrying out of the works;
- Details of the arrangements for public engagement / consultation both prior to and continued liaison during the construction works;

- Measures to minimise the noise (including vibration) generated by the construction process to include proposed method of piling for foundations, the careful selection of plant and machinery and use of noise mitigation barrier(s);
- details of any floodlighting, including location, height, type and direction of light sources and intensity of illumination;
- the anticipated number, frequency and types of vehicles used during construction,
- the method of access and routing of vehicles during construction,
- the parking of vehicles by site operatives and visitors,
- the loading and unloading of plant, materials and waste,
- the storage of plant and materials used in construction of the development,
- The erection and maintenance of security hoarding including decorative displays and facilities for public viewing, where appropriate;
- the provision of wheel washing facilities and other works required to mitigate the impact of construction upon the public highway (including the provision of temporary Traffic Regulation Orders),
- Measures to control the emission of dust and dirt during construction; and
- A scheme for recycling / disposing of waste resulting from demolition and construction works.

Reason: In the interests of the safety/amenity of nearby residents & occupiers of any nearby noise sensitive premises, the safety & general amenities of the area and in the interests of highway safety in accordance with policies D DM1, QE SP1, QE DM1, QE DM2, QE DM3 and T SP1 of the Arun Local Plan and the NPPF. This is required to be a pre-commencement condition because it is necessary to have the site set-up agreed prior to access by construction staff.

- 9 Development shall not commence, other than works of site survey and investigation, until full details of the proposed surface water drainage scheme have been submitted to and approved in writing by the Local Planning Authority. The design should follow the hierarchy of preference for different types of surface water drainage disposal systems as set out in Approved Document H of the Building Regulations, and the recommendations of the SuDS Manual produced by CIRIA. Winter groundwater monitoring to establish highest annual ground water levels and winter Percolation testing to BRE 365, or similar approved, will be required to support the design of any Infiltration drainage. No building shall be occupied until the complete surface water drainage system serving the property has been implemented in accordance with the agreed details and the details so agreed shall be maintained in good working order in perpetuity.

Reason: To ensure that the proposed development is satisfactorily drained in accordance with policies W SP1, W DM1, W DM2 and W DM3 of the Arun Local Plan. This is required to be a pre-commencement condition because it is necessary to implement the surface water drainage system prior to commencing any building works.

- 10 The development shall not proceed until details have been submitted to and approved in writing by the Local Planning Authority for any proposals: to discharge flows to watercourses; or for the culverting, diversion, infilling or obstruction of any watercourse on or adjacent to the site. Any discharge to a watercourse must be at a rate no greater than the pre-development run-off values. No construction is permitted, which will restrict current and future land owners from undertaking their riparian maintenance responsibilities in respect to any watercourse or culvert on or adjacent to the site.

Reason: To ensure that the proposed development is satisfactorily drained in accordance with policies W DM1, W DM2 and W DM3 of the Arun Local Plan. And to ensure that the duties and responsibilities, as required under the Land Drainage Act 1991, and amended by the Flood and Water Management Act 2010, can be fulfilled without additional impediment following the development completion. It is considered necessary for this to be a pre-commencement condition to protect existing watercourses prior to the construction commencing.

- 11 Development shall not commence until full details of the maintenance and management of the surface water drainage system is set out in a site-specific maintenance manual and submitted to, and approved in writing, by the Local Planning Authority. The manual is to include details of financial management and arrangements for the replacement of major components at the end of the manufacturer's recommended design life. Upon completed construction of the surface water drainage system, the owner or management company shall strictly adhere to and implement the recommendations contained within the manual.

Reason: To ensure that the proposed development is satisfactorily drained in accordance with policies W DM1, W DM2 and W DM3 of the Arun Local Plan. It is considered necessary for this to be a pre-commencement condition to ensure that the future maintenance and funding arrangements for the surface water disposal scheme are agreed before construction commences.

- 12 Development shall not commence, other than works of site survey and investigation, until a Soil Resource Plan has been submitted to and approved in writing by the Local Planning Authority. This shall set out how the best and most versatile soils on the site are to be protected during construction and then recycled/reused in the new development layout. The soil protection/mitigation measures shall be implemented as per the document and then permanently adhered to throughout the construction and development of the site.

Reason: In accordance with Arun Local Plan policy SO DM1 and the National Planning Policy Framework. It is considered necessary for this to be a pre-commencement condition to protect the best and most versatile soils on the site prior to the construction commencing.

- 13 Prior to commencement of the development hereby approved (or such other date or stage in development as may be agreed in writing with the Local Planning Authority), the following components of a scheme to deal with the risks associated with contamination of the site shall each be submitted to and approved in writing by the Local Planning Authority:

1. A 'Preliminary Risk Assessment' which has identified: all previous (historical) uses; potential contaminants associated with those uses; a conceptual model of the site indicating sources, pathways and receptors; and potentially unacceptable risks arising from contamination at the site.

2. A 'Site Investigation Scheme', based on (1) above to provide information for a detailed assessment of the risk to all receptors that may be affected, including those off site.

3. Based on the 'Site Investigation Scheme' and the detailed risk assessment (2), an options appraisal and remediation strategy giving full details of the remediation measures required and how they are to be undertaken.

4. A 'Verification Report' providing details of the data that will be collected in order to demonstrate that the works set out in (3) are complete and identifying any requirements for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action.

Any changes to these components, (1) to (4) require the express written consent of the Local Planning Authority.

The scheme shall be implemented as approved above and, prior to commencement of any construction work (or such other date or stage in development as may be agreed in writing with the Local Planning Authority), a Verification Report demonstrating completion of the works set out in the approved remediation strategy and the effectiveness of that remediation shall be submitted to and approved in writing by the Local Planning Authority. The report shall include results of sampling and monitoring carried out in accordance with the approved verification plan to

demonstrate that the site remediation criteria have been met. The report shall also include a 'long-term monitoring and maintenance plan' for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action, as identified in the verification report, and for the reporting of this in writing to the Local Planning Authority.

Reason: To ensure that the development complies with approved details in the interests of protection of the environment and prevention of harm to human health in accordance with Arun Local Plan policies QE SP1 and QE DM4. This is required to be a pre-commencement condition because these details have to be agreed and in place before any work commences.

- 14 At least 10% of the energy supply of the development shall be secured from decentralised and renewable or low carbon energy sources (as described in the glossary at Annex 2 of the National Planning Policy Framework) unless it can be demonstrated that a fabric-first approach would achieve an equivalent energy saving. Details and a timetable of how this is to be achieved for each phase or sub phase of development, including details of physical works on site, shall be submitted to and approved in writing by the Local Planning Authority before any development in that phase or sub phase begins. The development shall be implemented in accordance with the approved details and timetable and retained as operational thereafter.

Reason: In order to secure a reduction in the use of energy at the site in accordance with national planning policy and policy ECC SP2 of the Arun Local Plan. This is required to be a pre-commencement condition because the approved measures may need to be built into the fabric of the buildings.

- 15 Prior to the commencement of the development hereby approved, full details of the mitigation measures required in order to demonstrate that the internal noise levels within the residential units will conform to the "Indoor ambient noise levels for dwellings" guideline values specified within Table 4 under section 7.7.2 of BS 8233:2014 shall be submitted and approved in writing by the Local Planning Authority. The mitigation measures shall include those specified in sections 9, 9.1 and 9.2 of the noise report by Acoustic Associates Sussex Ltd dated 02/04/2020 Project ref; J2489.

Details shall be compiled by a competent acoustician on sound insulation and noise reduction for buildings. The scheme should take into account the correct number of air changes required for noise affected rooms and provide detail on the ventilation where this is required. The works specified in the approved scheme shall then be carried out in accordance with the approved details prior to occupation of the premises and be retained thereafter.

Reason: To protect the amenities of new residents from noise associated with the industrial site to the south and the main road to the west in accordance with Policy QE DM1 of the Arun Local Plan. This is required to be a pre-commencement condition because the approved measures may need to be built into the fabric of the buildings.

- 16 Prior to the commencement of construction works details of a proposed foul drainage system shall be submitted to and approved in writing by the Local Planning Authority (including details of its siting, design and subsequent management / maintenance) and no dwelling shall be occupied until works for the disposal of sewage have been fully implemented in accordance with the approved details.

Reason: To ensure that the proposed development has a satisfactory means of disposing of foul sewerage in accordance with policies W DM1 and W DM3 of the Arun Local Plan. This is required to be a pre-commencement condition because it is necessary to implement the foul water drainage system prior to commencing any building works.

- 17 Prior to the occupation of any part of the development, a strategy for the provision of the highest

available headline speed of broadband provision to future occupants of the site shall be submitted to and approved in writing by the Local Planning Authority. The strategy shall take into account the timetable for the delivery of 'superfast broadband' (defined as having a headline access speed of 24Mb or more) in the vicinity of the site (to the extent that such information is available). The strategy shall seek to ensure that upon occupation of a dwelling, the provision of the highest available headline speed of broadband service to that dwelling from a site-wide network is in place and provided as part of the initial highway works and in the construction of frontage thresholds to dwellings that abut the highway. Unless evidence is put forward and agreed in writing by the Local Planning Authority that technological advances for the provision of a broadband service for the majority of potential customers will no longer necessitate below ground infrastructure, the development of the site will continue in accordance with the approved strategy.

Reason: To safeguard the amenities of future residents in accordance with Arun Local Plan policy TEL SP1.

- 18 Prior to the occupation of any part of the development, full details of new external lighting shall be submitted to and approved in writing by the Local Planning Authority. These details shall include the predictions of both horizontal illuminance across the site and vertical illuminance affecting immediately adjacent receptors. The lighting installation shall comply with the recommendations of the Institution of Lighting Professionals (ILP) "Guidance Notes for the Reduction of Obtrusive Light" (GN01:2011). The scheme shall also minimise potential impacts to any bats using the trees, hedgerows and buildings by avoiding unnecessary artificial light spill through the use of directional light sources and shielding.

Prior to occupation, the predicted illuminance levels shall be tested by a competent person to ensure that the illuminance levels agreed in the scheme are achieved. Where these levels have not been met, a report shall demonstrate what measures have been taken to reduce the levels to those agreed within the application scheme. The lighting approved shall be installed and shall be maintained in accordance with the approved details.

Reason: In the interests of the amenities of the area, the site biodiversity (particularly in respect of bats), the interests of minimising crime and to minimise unnecessary light spillage outside the development site in accordance with policies QE SP1, QE DM2 & ENV DM5 of the Arun Local Plan.

- 19 Prior to the occupation of the dwellings, a scheme for the provision of facilities to enable the charging of electric vehicles to serve the approved dwellings shall be submitted to the local planning authority for approval and thereafter implemented in accordance with the approved details and the charge points shall thereafter be permanently retained and maintained in good working condition.

Reason: New petrol, diesel and hybrid cars/vans will not be sold beyond 2035, and to mitigate against any potential adverse impact of the development on local air quality, in accordance with policy QE DM3 (c) of the Arun Local Plan, the Arun Parking Standards SPD and the National Planning Policy Framework.

- 20 No part of the development shall be first occupied until such time as the vehicular access serving the development has been constructed in accordance with the details shown on the drawing titled Access Plan and numbered 6530A/102 Rev B.

Reason: In the interests of road safety in accordance with Arun Local Plan policy T SP1.

- 21 No dwelling shall be first occupied until the car parking serving the respective dwellings have been constructed in accordance with plans and details to be submitted to and approved in writing by the Local Planning Authority. Once provided the spaces shall thereafter be retained at all

times for their designated purpose.

Reason: In the interests of road safety and to provide adequate on-site car parking for the development in accordance with Arun Local Plan policy T SP1.

- 22 No dwelling shall be first occupied until covered and secure cycle parking spaces serving the respective dwellings have been provided in accordance with plans and details to be submitted to and approved by the Local Planning Authority.

Reason: To provide alternative travel options to the use of the car in accordance with Arun Local Plan policy T SP1.

- 23 Immediately following implementation of the approved surface water drainage system and prior to occupation of any part of the development, the developer/applicant shall provide the local planning authority with as-built drawings of the implemented scheme together with a completion report prepared by an independent engineer that confirms that the scheme was built in accordance with the approved drawing/s and is fit for purpose. The scheme shall thereafter be maintained in perpetuity.

Reason: To ensure that the proposed development is satisfactorily drained in accordance with policies W SP1, W DM1, W DM2 and W DM3 of the Arun Local Plan.

- 24 If, during development, contamination not previously identified is found to be present at the site then no further development (unless otherwise agreed in writing with the local planning authority) shall be carried out until a remediation strategy detailing how this contamination will be dealt with has been submitted to, and approved in writing by, the local planning authority. The remediation strategy shall be implemented as approved.

Reason: To ensure that the development does not contribute to, is not put at unacceptable risk from, or adversely affected by, unacceptable levels of water pollution from previously unidentified contamination sources at the development site. This is in line with paragraph 170 of the National Planning Policy Framework and policy QE DM4 of the Arun Local Plan.

INFORMATIVE: Statement pursuant to Article 35 of the Town and Country Planning (Development Management Procedure)(England) Order 2015. The Local Planning Authority has acted positively and proactively in determining this application by assessing the proposal against all material considerations, including planning policies and any representations that may have been received and subsequently determining to grant planning permission in accordance with the presumption in favour of sustainable development, as set out within the National Planning Policy Framework.

INFORMATIVE: This decision has been granted in conjunction with a Section 106 legal agreement relating to:

(1) Affordable Housing

12 dwellings with a tenure split of 75% affordable rented and 25% shared ownership housing. To be provided not later than 50% occupation of the development.

(2) On-site Local Play

A Local Equipped Area of Play (LEAP) of 460m² to be provided on the site together with either a management plan (if to be private) or a £30,000 maintenance contribution (if adopted by the LPA).

(3) On-site Public Open Space (POS)

Provision of sufficient on-site POS (2675m²) together with either a management plan (if to be private) or a £45,157 maintenance contribution (if adopted by the LPA).

INFORMATIVE: In addition to the Section 106 Legal Agreement, this application would also be liable for CIL in accordance with the Councils CIL Charging Schedule available to view at: <https://www.arun.gov.uk/cil>.

INFORMATIVE: The applicant is advised that the erection of temporary directional signage should be agreed with the Local Traffic Engineer prior to any signage being installed. The applicant should be aware that a charge will be applied for this service.

INFORMATIVE: If in the future it is determined that the onsite Tree 01 should be felled then a bat survey may be required as the tree has potential as a bat roost. If any bats are found then a Natural England Protected Species License will be required and this will need to be obtained prior to any works taking place.

INFORMATIVE: The applicant should note that under Part 1 of the Wildlife and Countryside Act 1981, with only a few exceptions, it is an offence for any person to intentionally take, damage or destroy the nest of any wild birds while the nest is in use or being built. Birds nest between March and September and therefore removal of dense bushes, ivy or trees or parts of trees etc. during this period could lead to an offence under the act.

INFORMATIVE: This notice does not give authority to destroy or damage a bat roost or disturb a bat. Bat species are protected under Section 39 of the 1994 Conservation (Natural Habitats etc) Regulations (as amended), the 1981 Wildlife and Countryside Act (as amended) and the 2000 Countryside and Rights of Way Act. It is illegal to damage or destroy any bat roost, whether occupied or not, or disturb or harm a bat. If you are aware that bats roost in a tree(s) for which work is planned, you should take further advice from Natural England (via the Bat Conservation Trust on 0845 1300228) or an ecological consultant before you start. If bats are discovered during the work, you must stop immediately and contact Natural England before continuing.

INFORMATIVE A formal application for connection to the public sewerage system is required in order to service this development, please contact Southern Water, Sparrowgrove House, Sparrowgrove, Otterbourne, Hampshire SO21 2SW (Tel: 0330 303 0119) or www.southernwater.co.uk. Please read the New Connections Services Charging Arrangements documents which is available to read on the SW website via the following link <https://beta.southernwater.co.uk/infrastructurecharges>.

INFORMATIVE: In the interests of crime prevention and deterrence, the development should incorporate security measures in accordance with the consultation advice of Sussex Police (dated 12/03/20) as available on the Councils website.

INFORMATIVE: Infiltration rates for soakage structures are to be based on percolation tests undertaken in the winter period and at the location and depth of the proposed structures. The percolation tests must be carried out in accordance with BRE365, CIRIA R156 or a similar approved method and cater for the 1 in 10 year storm between the invert of the entry pipe to the soakaway, and the base of the structure. It must also have provision to ensure that there is capacity in the system to contain below ground level the 1 in 100 year event plus 40% on stored volumes, as an allowance for climate change. Adequate freeboard must be provided between the base of the soakaway structure and the highest recorded annual groundwater level identified in that location. Any SuDS or soakaway design must include adequate groundwater monitoring data to determine the highest winter groundwater table in support of the design. The applicant is advised to discuss the extent of groundwater monitoring with the Council's Engineers. Supplementary guidance notes regarding surface water drainage are located here <https://www.arun.gov.uk/surfacewater> on Arun District Councils website. A surface water drainage checklist is available here

<https://www.arun.gov.uk/drainagechecklist> on Arun District Councils website, this should be submitted with a Discharge of Conditions Application.

INFORMATIVE: Under Section 23 of the Land Drainage Act 1991 Land Drainage Consent must be sought from the Lead Local Flood Authority (West Sussex County Council), or its agent (Arun District Council land.drainage@arun.gov.uk), prior to starting any works (temporary or permanent) that affect the flow of water in an ordinary watercourse. Such works may include culverting, channel diversion, discharge of flows, connections, headwalls and the installation of trash screens.

The development layout must take account of any existing watercourses (open or culverted) to ensure that future access for maintenance is not restricted. No development is permitted within 3m of the bank of an ordinary watercourse, or 3m of a culverted ordinary watercourse.

INFORMATIVE: If during construction works, it becomes apparent that implementation cannot be carried in accordance with previously agreed details any resubmission of the drainage design must be accompanied by an updated copy of the management manual.

INFORMATIVE: The granting of this planning permission does not in any way indemnify against statutory nuisance action being taken should substantiated complaints within the remit of the Environmental Protection Act 1990 be received.

INFORMATIVE: The Reserved Matters submission should include an air quality assessment and details of mitigation as required. The applicant should follow the Air Quality & Emissions Mitigation Guidance for Sussex (2019), available at:

<https://www.arun.gov.uk/download.cfm?doc=docm93jjm4n14025.pdf&ver=14269>. This countywide adopted guidance states that where a major sized development is proposed a number of checklists should be followed in order to determine the likely impact of the proposed development on air quality. The intention of the guidance is to identify any air quality impacts through an impact assessment and ensure the integration of appropriate mitigation into a scheme at the design stage, so the damage costs on health can be properly mitigated. The air quality impact assessment can follow the procedures contained within the Institute of Air Quality Management (IAQM) Guidance entitled: 'Land-Use Planning & Development Control: Planning For Air Quality' (January 2017), available at: <http://www.iaqm.co.uk/text/guidance/air-quality-planning-guidance.pdf>.

Neil Crowther
Group Head of Planning

Case Officer: Mr S Davis

Decision Issued: **30th October 2020**

Arun District Council
The Arun Civic Centre
Maltravers Road
Littlehampton
West Sussex BN17 5LF

IT IS IMPORTANT THAT YOU READ THE NOTES ATTACHED TO THIS DOCUMENT

APPEALS TO THE SECRETARY OF STATE

If you are aggrieved by the decision of your local planning authority to refuse permission for the proposed development or to grant it subject to conditions, then you can appeal to the Secretary of State under section 78 of the Town and Country Planning Act 1990.

If this is a decision on a planning application relating to the same or substantially the same land and development as is already the subject of an enforcement notice, and you want to appeal against this planning application decision, then you must do so within 28 days of the date of this notice.

If an enforcement notice is served relating to the same or substantially the same land and development as in your application and you want to appeal against this planning application decision, then you must do so within 28 days of the date of service of the enforcement notice, or within 6 months of the date of this notice, whichever period expires earlier.

Otherwise, if you want to appeal against this decision then you must do so within 6 months of the date of this notice.

Appeals must be using a form which you can get from the Secretary of State at Temple Quay House, 2 The Square, Temple Quay, Bristol BS1 6PN (Tel: 0303 444 5000) or online at <http://acp.planninginspectorate.gov.uk>

The Secretary of State can allow a longer period for giving notice of an appeal but will not normally be prepared to use this power unless there are special circumstances which excuse the delay in giving notice of appeal.

The Secretary of State need not consider an appeal if it seems to the Secretary of State that the local planning authority could not have granted planning permission for the proposed development or could not have granted it without the conditions they imposed, having regard to the statutory requirements, to the provisions of any development order and to any directions given under a development order.

If you intend to submit an appeal that you would like examined by inquiry then you must send notice to the Local Planning Authority and Planning Inspectorate(inquiryappeals@planninginspectorate.gov.uk) at least 10 days before submitting the appeal. Further details can be found at www.GOV.uk

PURCHASE NOTICES

If either the local planning authority or the Secretary of State refused permission to develop land or grants it subject to conditions, the owner may claim that he can neither put the land to a reasonably beneficial use in its existing state nor render the land capable of a reasonably beneficial use by the carrying out of any development which has been or would be permitted.

In these circumstances, the owner may serve a purchase notice on the Council (that is, where the land is situated in a National Park, the National Park authority for the Park, or in any other case the district council in whose area the land is situated). This notice will require the Council to purchase the owner's interest in the land in accordance with the provisions of Chapter 1 of Part VI of the Town & Country Planning Act 1990.

Please note that this decision notice only relates to matters under the Planning Acts and does not give consent under any other legislation that may apply to the development. You will need to carry out your own checks to determine whether any other consents or permissions are required. For example, the Building Regulations are likely to apply to most developments, and a Highways Licence may be required from West Sussex County Council for any development within the public highway (including the placing of skips on

highway land).
