Subject: AL/27/19/DOC - GTR DENMANS LANE FONTWELL

I am chasing a consultation response on AL/27/19/DOC which seeks the discharge of condition 08 *"Piling or any other foundation designs using penetrative methods shall not be permitted other than with the express written consent of the Local Planning Authority, which will only be given for those parts of the site where it has been demonstrated that there is no resultant unacceptable risk to controlled waters."*

The application states that although piling is not used they will be using concrete blocks to a max depth of 1.75m. Having discussed with Building Control officers here, I consider that this is a penetrative method hence the need to gain approval. Can you therefore advise whether you are in agreement with this? There are additional details of the foundations in the plans available on our website

The consultation request was sent on the 18th March. I look forward to hearing from you.

Kind Regards
