Hi John,

Thanks for this. However, I am consulting Portsmouth Water because they initially wanted the condition imposing regarding the piling/other penetrative foundation methods. I am unable to discharge your proposed foundations without confirmation from Portsmouth Water.

Kind Regards

Dear Simon

Many thanks for your e-mail regarding the above.

Please find the attached copies of correspondence concerning the last extension at GTR and the EA and Portsmouth Water Company.

I believe that they have the same relevance to this application and therefore may be helpful to you

Kind regards

Jon

Dear John,

I'm afraid that we need more time. I had thought that the Environment Agency would be able to consider the foundation details but they are unable to comment therefore I have just sent out a consultation request to Portsmouth Water.

Kind Regards

Hi John,

In your email to me of 22/03/19 you stated that you were still waiting for the final drainage details. Until you can provide these to me, I don't see that our engineers can agree the condition approval.

Regarding condition 08, this only requires discharge if you are using piling or other foundation designs using penetrative methods. You state that piling or trenching will not be used but you are proposing a foundation depth of 1.75m. Therefore, do I assume that you are using a penetrative method? We have consulted the EA and I have not yet heard from them so I will chase today.

Kind Regards
