NOTES

The survey grid has been related to OS National Grid using a flat earth projection and metric scale factor of 1, centred on Station [WU16]. Levels are related to OS datum determined from the National GPS Network using OSGM15.

All setting out should be referenced to the permanent control stations shown on this survey. Do not use GNSS/GPS operating on the OS Active Network without first carrying out a site calibration.

The position and height of adjacent buildings have been obtained using higher level reflectorless measurement and may not take account of single storey extensions or conservatories below the line of sight.
