Dear Sir,

re Planning application AL/70/82

I refer to the above application and wish to register my objections to consent being given.

The land and stables in question was until 7th May '82 part of Norton Glebe which Mr Taylor sold to me on that date retaining the stable and former vegetable garden which I understood would be able to purchase from Mr Taylor at a later date.

Mr Taylor has already started work on the stables, and stopped when I convinced him he would need planning permission which he has now applied for.

I do not wish this building to be turned into a residential property as it is only a few yards (20-25) from my property and would not only reduce my privacy but I fully expect my Mr Taylor, should he get consent, to sell the property to another party and therefore reduce my intention to re-instate

Norton Globe to its former state.

● Prior to my purchase of Norton Globe, Mr Taylor had sold a large plot of the garden on the south side when he found he could not obtain permission to build on it.

I have since found out that Mr Taylor had installed water supplies and electricity from my property to the stable which I have since terminated and has also connected a sewerage system into my septic tank which will overstretch its capacity if used.

The whole property has purposely been neglected hedges, grass, etc to try and give the impression that if planning is given it will tidy the plot up. I have made repeated requests and offers to Mr Taylor to tidy but he has an obvious reason not to carry out any work.

I would be grateful if my name is not disclosed to any other party other than the council without my permission at this stage as I feel this could be held against me by Mr Taylor.

Yours faithfully,
