Dear **Mr Denton**,

Many thanks for your assistance by telephone this morning clarifying the additional details required regarding my Planning Application in relation to minor works to one tree in my Garden.

As outlined in the Application itself:-

'Partial crown reduction to 1 No Hornbeam. Reduction to one side of the tree only i.e. that adjacent to property. Reduction to allow 1.5m clearance of ridge tiles, guttering and window'.

So to clarify; there is to be no reduction to the height of the tree. Small branches are to be removed on one side of the tree adjacent to my house. This will be to circa 25% of the circumference of the tree. In answer to your specific point about there being no measurements within the Application. The reduction to the side of the tree will be no more than 1.5m.

This work is necessary to remove branches that are lying on the roof tiles and interfering with the guttering and window.

I trust this satisfies your queries?

Regards
